

In This Issue:

- New offices for a growing company
- Recent sales and orders
- R&D moves ahead
- MRgFUS treats brain and other tumors
- Site installations on the rise
- New employees and appointments
- Pleasure, not business, on company days
- Conferences raise awareness of MRgFUS
- Bringing patients into the loop
- InSightec in the spotlight
- Making harmony between music and physics

Job well done IT!

The InSightec IT team achieved the near-impossible. After the Haifa office's move, all systems were up and running within a single day.

To all InSightec Employees,

This issue of Inside InSightec covers, in brief, company news of the last nine months. The items within clearly illustrate how InSightec, during the first half of 2005, has been characterized by growth, dynamism, and perhaps, above all, movement. In these pages, you will get a sense of the momentum we've been gathering, and of our continuing innovation, expansion and achievement.

From this point, we hope to issue Inside InSightec on a regular basis. Intended to be a two-way channel of communication, Inside InSightec welcomes your feedback on this issue, and your suggestions regarding future contents.

InSightec On the Move

New Israel Offices – Three Times Larger!

The demand for a larger production floor, new laboratories and rooms for staff in all departments, prompted the Haifa, Israel office to move to a new location, three times the size of its previous site. The new offices, divided over two floors, contain 52 rooms and 11 laboratories, as well as conference areas and storage space. With 15 spare rooms, "these new offices allow us excellent options for growth," says VP Human Resources, Haya Zarko.
